- Build team relationships and work in multiple working groups
- Continual using and learning new web technologies to improve the logistical process

## Projects

**The Borrowers** | <https://github.com/CrystalWatkins/final-project> | <https://desolate-caverns-47449.herokuapp.com/>

- This app allows you to post books and borrow books from your local neighbors. You post your books and are able to search through books posted in your area. Once communication begins, you're ready to enjoy your new book!
- Worked on back-end routes and getting the Google Books API in the database. Hashed passwords and worked with jwt.
- Technology: MERN stack, full CRUD functionality, Google Books API, jwt and hashing passwords, Bulma, CSS, db diagram.io, Sketch, Trello

**Done 'n Dusted** | <https://github.com/CrystalWatkins/grocr-receipt-app> | <https://fathomless-sands-26873.herokuapp.com/>

- This app allows you to upload a receipt from a store. you then receive an itemized list of purchases.
- Worked on the API Ajax call and Sequelize models to get the receipt to itemize.
- Technology: Veryfi API, db diagram.io, Sketch, Materializecss, NPM packages: express, express-handlebars, passport, mysql 2, express-session, bcrypt, handlebars, Sequelize, MVC, CRUD

**Remote island** | <https://github.com/CrystalWatkins/gt-project-1> | <https://crystalwatkins.github.io/gt-project-1/>

- This app allows users to choose a travel destination, once the location is selected, the user will be presented travel amenities. They will view a livestream video, present a random drink and optional recipe along with the weather.
- Weather API and drink recipe while helping out in other areas of the project
- Technology: OpenWeather API and CocktailDB API, HTML, CSS, Bootstrap for customized styling, and Javascript/jQuery to create dynamic web pages, images from Freepik, Google fonts
